## Stereotactic Radiosurgery Center Sigulda

New and modern medical facility that has been created to assist in the fight against cancer, benign tumors, and other diseases that are treatable with radiotherapy or radiation therapy. Our unique and extremely precise Cyberknife®M6 device is especially suitable for radiation therapy and is operated by highly qualified industry specialists.

Our most important task is to provide you with the best care throughout the whole process of treatment. Therefore our medical center has been developed with the purpose to unite the experience of professional medical personnel with the world's most modern radiation therapy technology, in order to make the treatment process as effective, safe, painless, and fast.

**SRC Sigulda** is located in one of Latvia's most beautiful cities - Sigulda, which is also referred to as little Switzerland. Sigulda was intentionally selected as the location for the center so that treatment time would allow you to spend time in an enjoyable environment outside of the bustle of the big city, while simultaneously receiving the highest standards of medical care, services, and confidentiality.

Do you live in one of European Union countries? Get back refund of expenses for treatment in Latvia!

A European Union directive states that a patient living in the EU has the right to choose a medical institution in the EEA (European Economic Area) and can lawfully recover the costs. For example, any person living in UK can seek healthcare abroad and be reimbursed from National Health Service, NHS.
